With its litter pickers and other implements, FLORA offers wide-ranging solutions for urban maintenance and facility management. For 30 years, advanced series Greifboys have been among the most successful litter pickers internationally - "Made in Germany", of course.

Advanced series of Greifboys
 - Durable and light-weight
 - Large variety

With a large number of different types, the advanced series of Greifboys is ideal for all sectors of rubbish collection. Based on a maintenance-free, internal mechanical system, they provide maximum durability, functionality and ergonomics.

Basic series of Greifboys
 - Solid and simple
 - Budget-priced for campaigns

The Greifboys in the "Basic" series offer tough quality at an attractive price. This makes them popular for environmental campaigns, in schools or for use in the home.

Kehrboys
 - Durable and made of steel
 - For outdoor use

Our Kehrboys are reliable implements for outdoor use. The thin steel and aluminium insert makes them light and handy, and also tough and durable.

Accessories
 - For outdoor cleaning
 - Safe, useful aid

Greifboy accessories include our bag holders, which hold a rubbish bag open wide to make filling easy. This is necessary for the fast, safe and clean collection of rubbish.

Greifboys, advanced series

This series uses an internal, maintenance-free mechanism, and its main features are its ergonomics and functionality. Landscaping specialists, municipalities and cleaning busines-

ses prefer these Greifboys for garbage disposal work, because they pick up a discarded phone card just as easily as a large champagne bottle.

All Greifboys are available with the following handles:

- Steel handle for gripping and direct power transfer
- An especially easy-to-use plastic handle or
- A low-cost lever handle

Greifboy 40:
